

INTEOS® Radiussystem 2.5

Radius head buttress plates

Advantages of the INTEOS® proximal radius head buttress plates

The new INTEOS® rim plate and radius head buttress plate from Hofer-medical is characterised by its delicate design, while maintaining maximal stability.

- + Anatomic precise shape
- + High rotational stability due to special plate design
- + Grid design allows easy shapping of the plate
- + Extra flat design
- + Completely submersible screw heads as a result of higher multidirectional angle stability
- + „Stick fit“ - the stable INTEOS® connection between screw and screwdriver blade
- + Fixed angle and multidirectional functionality thanks to the INTEOS® Small Fragment System standard 2.5

creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
